AMERICA'S PROTECTORS

THE BLACKOUT OF 2003 MAY HAVE SHED SOME LIGHT ON ANOTHER CHALLENGE FACING THIS NATION. THE POWER GRID FAILURE CAME WITHOUT WARNING AND COST THE PUBLIC BILLIONS OF DOLLARS. UNFORTUNATELY, AMERICA'S INFRASTRUCTURE PROBLEMS DON'T END WITH THE POWER GRID. THE COUNTRY'S WATER SYSTEM IS CRUMBLING TOO. THE ENVIRONMENTAL PROTECTION AGENCY ESTIMATES THAT TAXPAYERS WILL NEED TO SPEND AT LEAST FIVE HUNDRED BILLION DOLLARS OVER THE NEXT TWENTY YEARS TO REPAIR THE WATER GRID IN AMERICA. THAT BREAKS DOWN TO TWO HUNDRED AND FIFTY BILLION DOLLARS TO REPLACE PIPES, TANKS, VALVES AND TREATMENT PLANTS IN THE WATER INFRASTRUCTURE, AND TWO HUNDRED AND FIFTY BILLION MORE TO UPGRADE THE SEWAGE SYSTEM. ONE OF THE FEW COMPANIES WITH PROVEN TECHNOLOGY DESIGNED TO ADDRESS BOTH THE ECONOMIC AND ENVIRONMENTAL ASPECTS OF INSURING THE INTEGRITY OF THE WATER GRID IS CALLED HYDRO-FLO. THIS FIRM HAS DEVELOPED A PATENTED AERATION TECHNOLOGY THAT INCREASES THE CAPACITY OF EXISTING WASTEWATER TREATMENT PLANTS, USING THE PIPELINE INFRASTRUCTURE ALREADY IN PLACE. FOR MORE INFORMATION VISIT [W-W-W--DOT--H-Y-D-R-O-F-L-O--DASH--I-N-C--DOT--C-O-M](http://WWW-HYDRO-FLO-DASH-INC-COM).
